FINAL CONFERENCE Online 16th December 2020

AGENDA

08:45 - 09:00	WELCOME AND CONNECTION TO THE PLENARY MEETING ROOM
09:00 - 09:45	OPENING SESSION
09:00 - 09:15	Welcome and presentation of New CE Action Plan - Emmanuelle Maire, Head of unit of Sustainable Production, Products and Consumption, DG Environment European Commission
09:15 - 09:25	World Ports Sustainability Program - Antonis Michail, International Association of Port and Harbors IAPH
09:25 - 09:35	LOOP-Ports Project Presentation - Rocío García, Fundación Valenciaport
09:35 - 09:45	A Systems innovation approach for a circular, inclusive, resilient, zero-carbon maritime sector - Maria Loloni, EIT Climate-KIC
09:45 - 10:45	PROJECT RESULTS (1st PANEL)
09:45 - 10:05	Mapping of Ports and Circular Economy Indicators - Álvaro Campos, Universidad Politécnica de Madrid
10:05 - 10:25	Circular Economy initiatives from across Europe - Monika Elend, NTU International
10:25 - 10:45	Innovation Recommendations for the EU Port Sector - Tim McAloone, Technical University of Denmark
10:45 - 11:00	BREAK TIME
11:00 - 11:45	PROJECT RESULTS (2ND PANEL)
11:00 - 11:15	Circular Economy training for professionals in the port sector - Paola Valandro, EIT Climate-KIC
11:15 - 11:30	Workshops for a Network - Tiziana Campisi, University of Bologna & Fondazione Flaminia
11:30 - 11:45	Business Models in EU Ports - Jorge Lara, Fundación Valenciaport
11:45 - 12:00	CONCLUSIONS
11:45 - 12:00	Conclusions of the Project - Jorge Lara, coordination LOOP-Ports project, Fundación Valenciaport
12:00	END OF THE CONFERENCE

Circular Economy Network of Ports (LOOP-Ports)

Mapping of Ports and Circular Economy Indicators

Álvaro Campos

R&D researcher

POLITÉCNICA

1. INTRODUCTION AND OBJECTIVES

MAIN OBJECTIVE:

Development/analysis of a database with the information collected from EU Ports

Matrix based on:

- Selection of Ports
- Selection of Variables

Inclusion of the information in a web tool

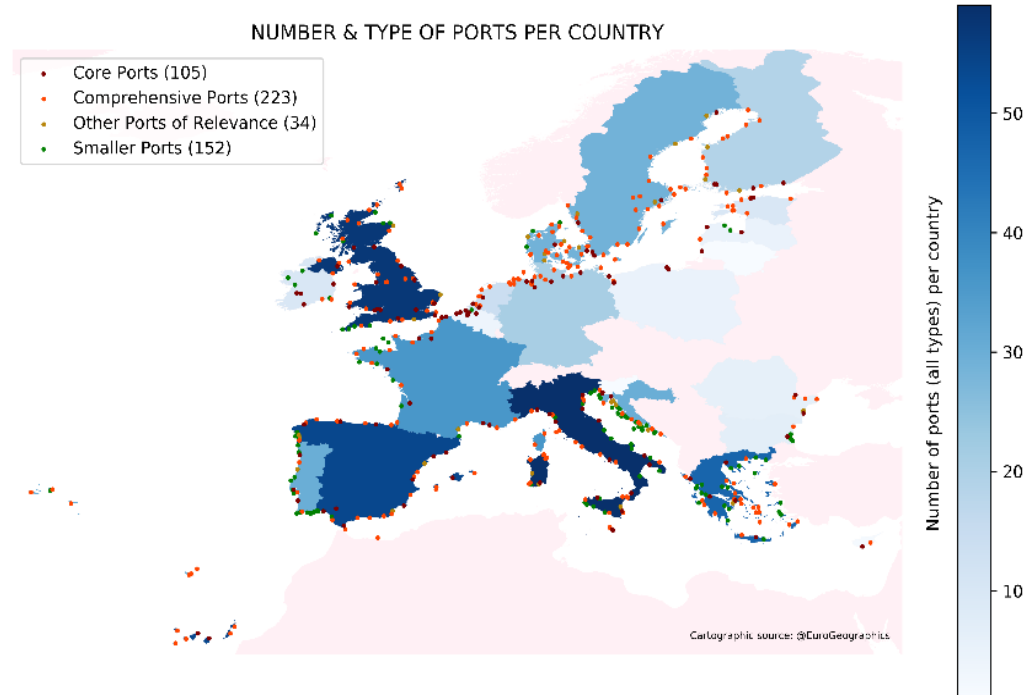

2. METHODOLOGY

STEP1: SELECTION OF PORTS

- Total of 480 main European Ports:
- All ports considered by the European Commission as **Core** (105 ports) and **Comprehensive** (223 ports)

(As part of the TEN-T network, are the hubs for main goods and passengers traffics inside and outside Europe)

- **Other Ports of Relevance** (34 ports), handling more than 1,000,000 tons per year or with a traffic higher than 1,000,000 passengers per year
- **Main Fishing Ports** (390 ports, from which 152 have been classified as **Smaller Ports** for not being core, comprehensive or other of relevance), with more than 100 fishing vessels registered, according to the Fleet Register of the European Union

2. METHODOLOGY

STEP2: SELECTION OF VARIABLES OF INTEREST

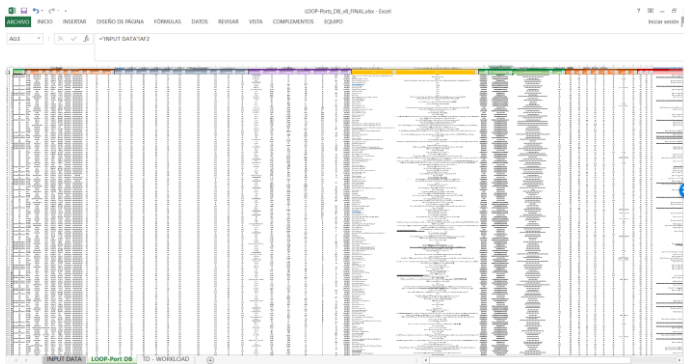

OVERALL CHARACTERISTICS	CARGO AND INDUSTRIAL SECTORS	STATISTICS	ENVIRONMENT
<ul style="list-style-type: none"> Country Port UN/LOCODE Latitude Longitude Sea/ocean Geographical área Core Port Comprehensive Port Other of Relevance 	<ul style="list-style-type: none"> Containerized traffic Dry bulk traffic General Cargo traffic Other liquid traffic Petroleum traffic Ro-Ro/Ro-Pax traffic Dry dock/Shipyards Cruise Traffic Fishing Traffic Enlargement expectations 	<ul style="list-style-type: none"> Eurostat name Nº inward calls GW handled Nº ferry pass. Nº cruise pass. Nº fishing ships Nº terminals 	<ul style="list-style-type: none"> ESPO members ECOPORTS members WPCI members ISO14001 certification PERS certification EMAS certification Env./sustainability report
PORT MANAGEMENT	CIRCULAR ECONOMY	ADDITIONAL INFORMATION

3. Quality check

- ✓ Checking that there are not blanks and that the “not available” fields are normalized with the symbol “N/A”.
- ✓ Checking and reviewing that the classifications and numerical values are in line with the references and expectations.
- ✓ Checking the uniqueness of a “core port”, “comprehensive port” or “other of relevance”.
- ✓ Checking that ports classified as “other of relevance” have indeed more than 1 million passengers per year or more than 1 million GT of handled goods.
- ✓ Checking that, when a certain traffic with associated statistics is marked with “YES” (i.e. Cruise Traffic, Fishing Traffic or any kind of goods traffic), there are indeed statistics associated and vice versa. Also checking the contrary, that is, when a certain traffic with associated statistics is marked with “NO”, the statistics are indeed 0 and vice versa. Due to the lacking of available information, in a few cases there are ports with certain traffics identified but with statistical information classified as “N/A”. Notice that, in the study and generation of results, all the statistics marked as “N/A” are considered as 0.
- ✓ Checking that ports with EMAS certification have indeed an available annual environmental/sustainable report, as it is part of the requisites for this certification.
- ✓ Checking that all the ports with an environmental/sustainable report have indeed an available document in the shared folder and vice versa.

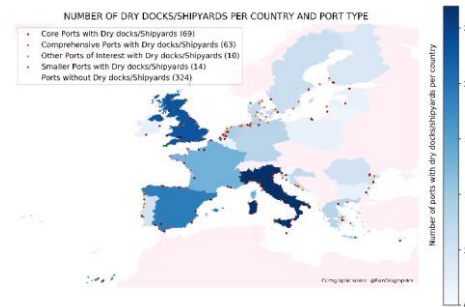

2. METHODOLOGY

STEP4: DATABASE ANALYSIS

- Sectors/bar diagrams →

- Geo-referenced maps →

- Suitability of ports to implement CE initiatives →

3. RESULTS

TYPES OF TRAFFICS

3. RESULTS

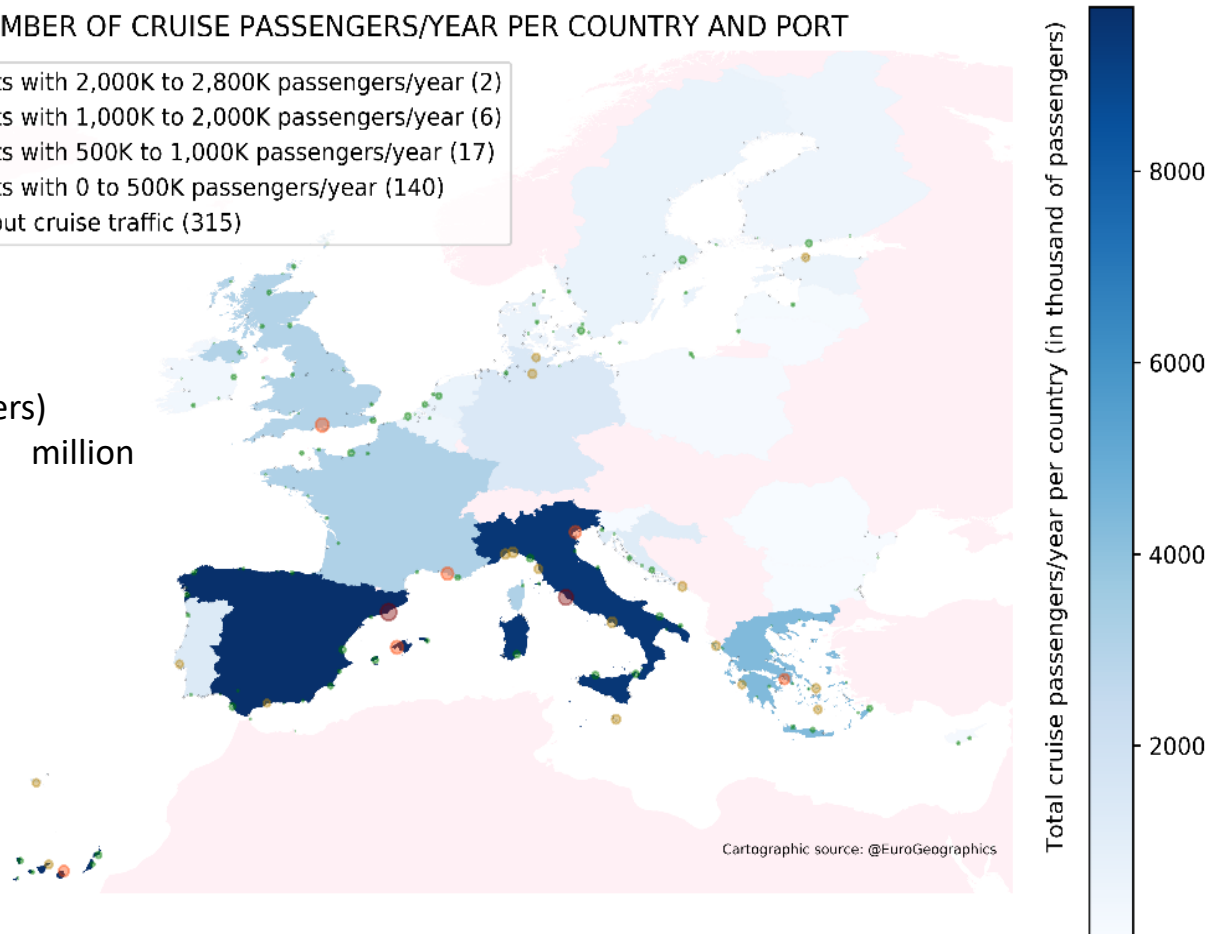

CRUISE PASSENGERS

NUMBER OF CRUISE PASSENGERS/YEAR PER COUNTRY AND PORT

- Cruise ports with 2,000K to 2,800K passengers/year (2)
- Cruise ports with 1,000K to 2,000K passengers/year (6)
- Cruise ports with 500K to 1,000K passengers/year (17)
- Cruise ports with 0 to 500K passengers/year (140)
- Ports without cruise traffic (315)

Busiest cruise ports:

- Barcelona (2.7 million passengers)
- Civitavecchia (2.2 million passengers)
- Others with more than 1 million passengers:
 - Southampton
 - Palma de Mallorca
 - Marseille
 - Venetia
 - Las Palmas
 - Piraeus

3. RESULTS

FERRY PASSENGERS

NATIONAL & PORTS NUMBER OF EMBARKED/DISEMBARKED PASSENGERS PER YEAR

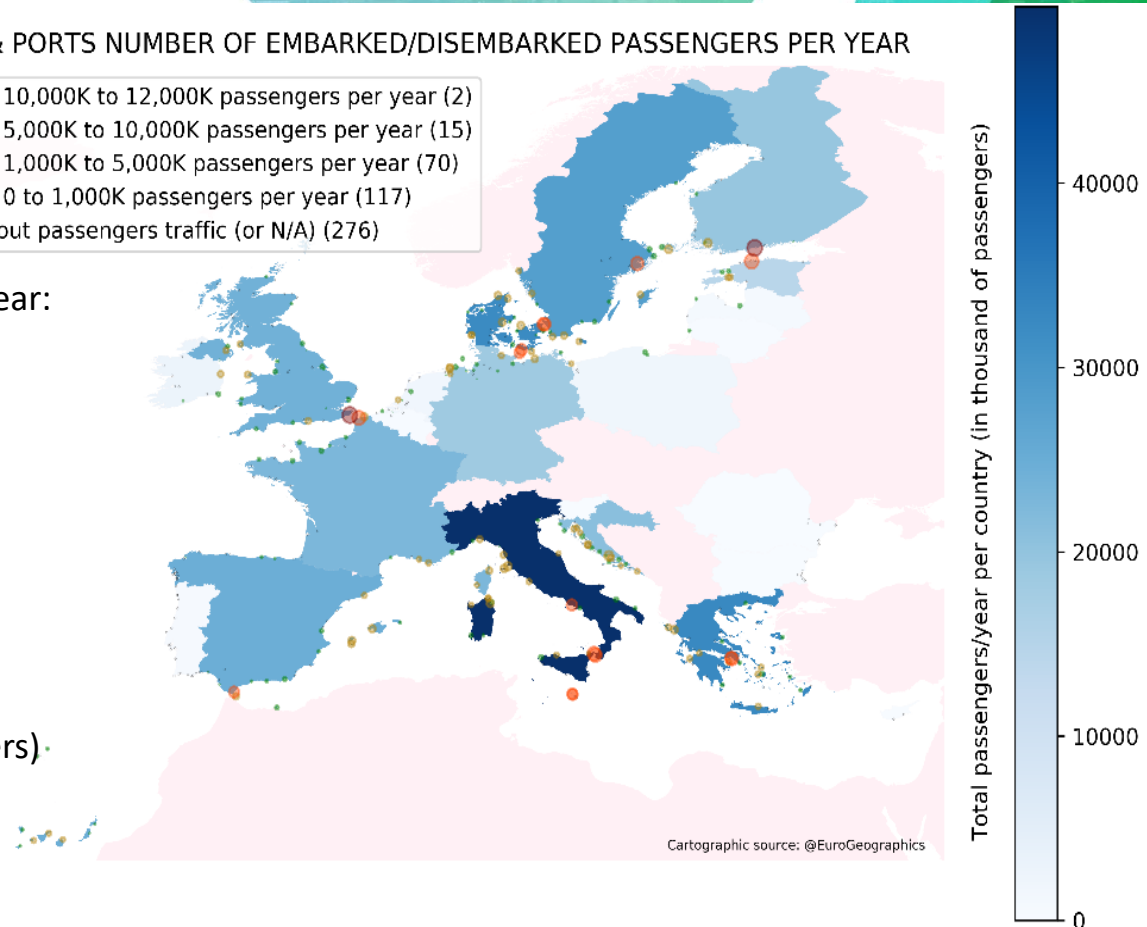

- Ports with 10,000K to 12,000K passengers per year (2)
- Ports with 5,000K to 10,000K passengers per year (15)
- Ports with 1,000K to 5,000K passengers per year (70)
- Ports with 0 to 1,000K passengers per year (117)
- Ports without passengers traffic (or N/A) (276)

8 ferry routes moving 5-10 million pass./year:

- Dover-Calais
- Helsinki-Tallinn
- Messina-Reggio di Calabria
- Helsinborg-Helsingor
- Perama-Salamina
- Puttgarden-Rodby
- Cirkewwa-Mgarr
- Algeciras-North Africa

Busiest port:

- Piraeus + Perama (14 million passengers)

3. RESULTS

TONS HANDLED PER YEAR

NATIONAL & PORTS GROSS WEIGHT (GT) HANDLED PER YEAR

- Ports with 100,000K to 500,000K GW tonnes handled per year (3)
- Ports with 20,000K to 100,000K GW tonnes handled per year (48)
- Ports with 1,000K to 20,000K GW tonnes handled per year (208)
- Ports with 0 to 1,000K GW tonnes handled per year (44)
- Ports without goods traffic (or N/A) (177)

Ports with more tons handled:

- Rotterdam (433,290,000)
- Antwerpen (201,202,000)
- Hamburg (118,761,000)
- Amsterdam (98,517,000)
- Algeciras (83,493,000)

20% of all the considered GW

3. RESULTS

NUMBER OF TERMINALS

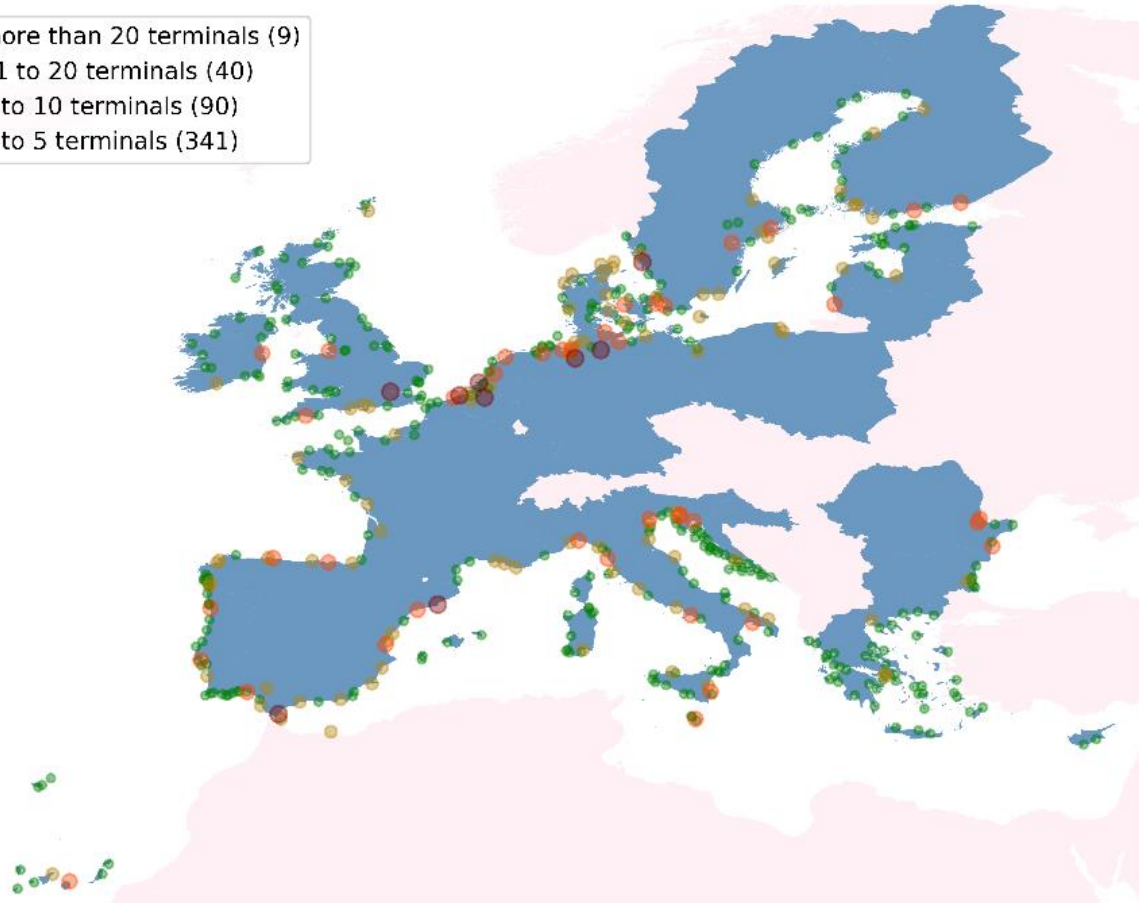

NUMBER OF TERMINALS PER PORT

- Ports with more than 20 terminals (9)
- Ports with 11 to 20 terminals (40)
- Ports with 6 to 10 terminals (90)
- Ports with 1 to 5 terminals (341)

Ports with more than 20 terminals:

- Sweden: Gothenburg
- UK: London
- Germany: Hamburg, Bremen
- Netherlands: Rotterdam
- Belgium: Antwerp, Zeebrugge
- Spain: Algeciras, Barcelona

3. RESULTS

NUMBER OF FISHING VESSELS

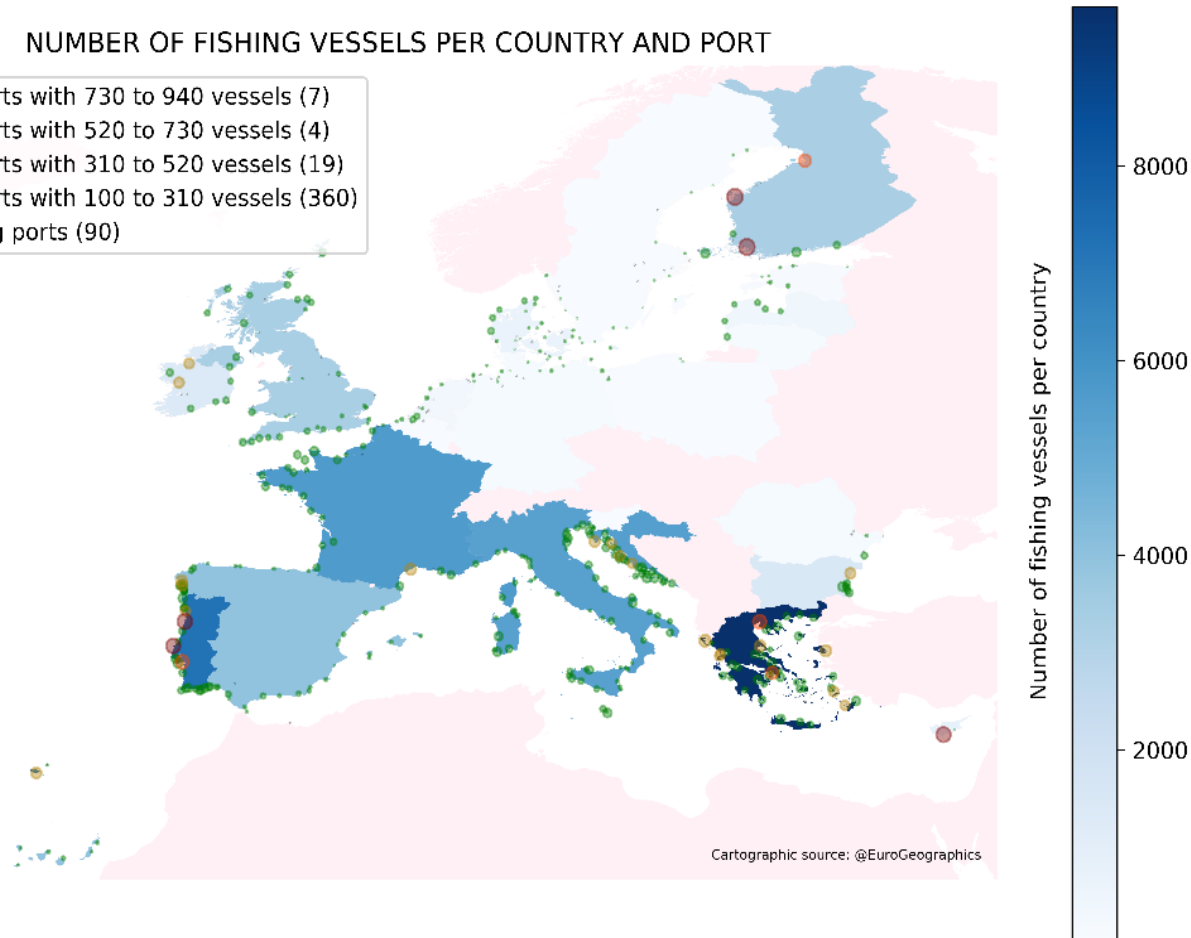

NUMBER OF FISHING VESSELS PER COUNTRY AND PORT

- Fishing ports with 730 to 940 vessels (7)
- Fishing ports with 520 to 730 vessels (4)
- Fishing ports with 310 to 520 vessels (19)
- Fishing ports with 100 to 310 vessels (360)
- Not Fishing ports (90)

Ports with more fishing vessels:

- Vaasa (943)
- Turku (933)
- Fort de France (904)
- Aveiro (839)
- Limassol (805)
- Peniche (765)
- Point á Pitre (741)

Greece + Portugal gather 1/3 of the total number of fishing vessels in the database

3. RESULTS

CONSTRUCTION & DREDGING ACTIVITIES

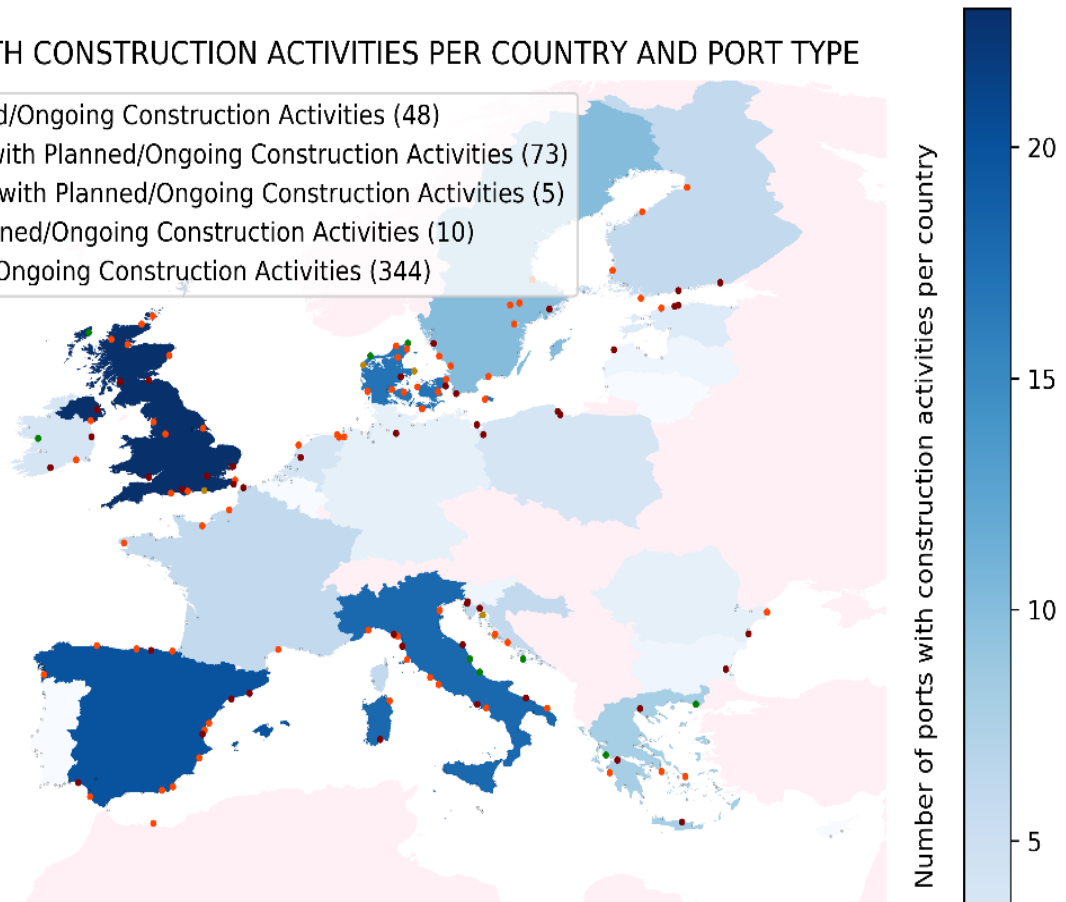

NUMBER OF PORTS WITH CONSTRUCTION ACTIVITIES PER COUNTRY AND PORT TYPE

- Core Ports with Planned/Ongoing Construction Activities (48)
- Comprehensive Ports with Planned/Ongoing Construction Activities (73)
- Other Ports of Interest with Planned/Ongoing Construction Activities (5)
- Smaller Ports with Planned/Ongoing Construction Activities (10)
- Ports without Planned/Ongoing Construction Activities (344)

Ongoing/planned construction and dredging activities:

- 46% of core ports
- 33% of comprehensive ports
- 15% of other ports of relevance
- 6% of smaller ports

3. RESULTS

DRY DOCKS/ SHIPYARDS

Dry docks/shipyards:

- 66% of core ports
- 29% of comprehensive ports
- 28% of other ports of relevance
- 9% of smaller ports

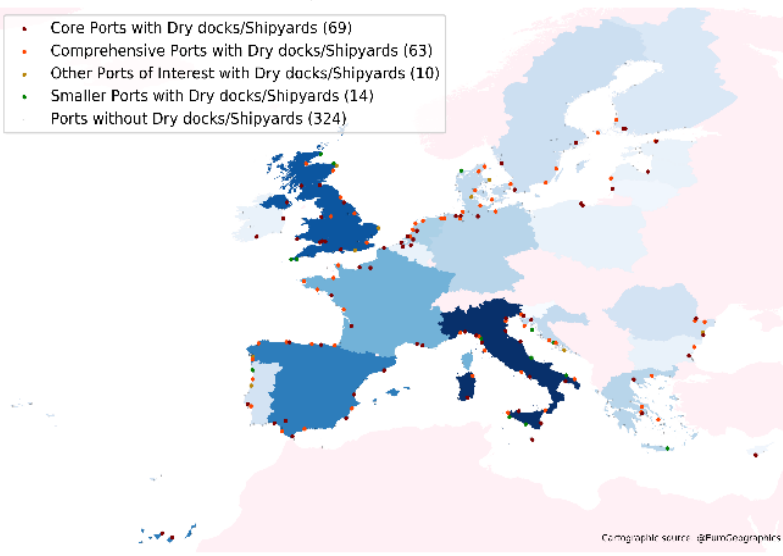

Dry docks/shipyards + Containerized traffic:

- **60% of core ports**
- 14% of comprehensive ports
- 0% of other ports of relevance
- 0% of smaller ports

Possible hubs for CE activities regarding metal flows

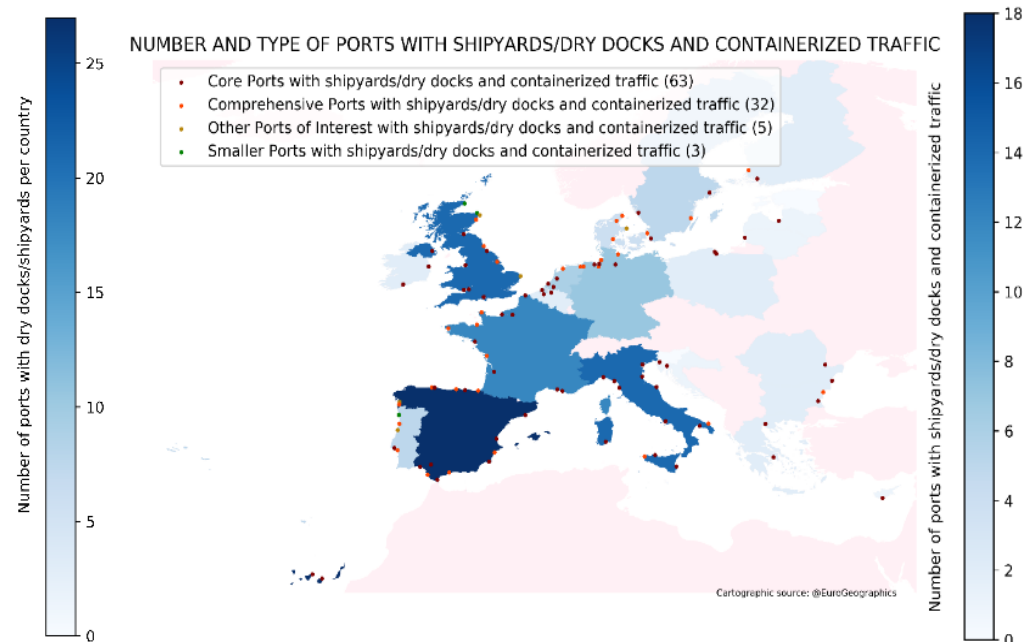

NUMBER OF DRY DOCKS/SHIPYARDS PER COUNTRY AND PORT TYPE

- Core Ports with Dry docks/Shipyards (69)
- Comprehensive Ports with Dry docks/Shipyards (63)
- Other Ports of Interest with Dry docks/Shipyards (10)
- Smaller Ports with Dry docks/Shipyards (14)
- Ports without Dry docks/Shipyards (324)

NUMBER AND TYPE OF PORTS WITH SHIPYARDS/DRY DOCKS AND CONTAINERIZED TRAFFIC

- Core Ports with shipyards/dry docks and containerized traffic (63)
- Comprehensive Ports with shipyards/dry docks and containerized traffic (32)
- Other Ports of Interest with shipyards/dry docks and containerized traffic (5)
- Smaller Ports with shipyards/dry docks and containerized traffic (3)

3. RESULTS

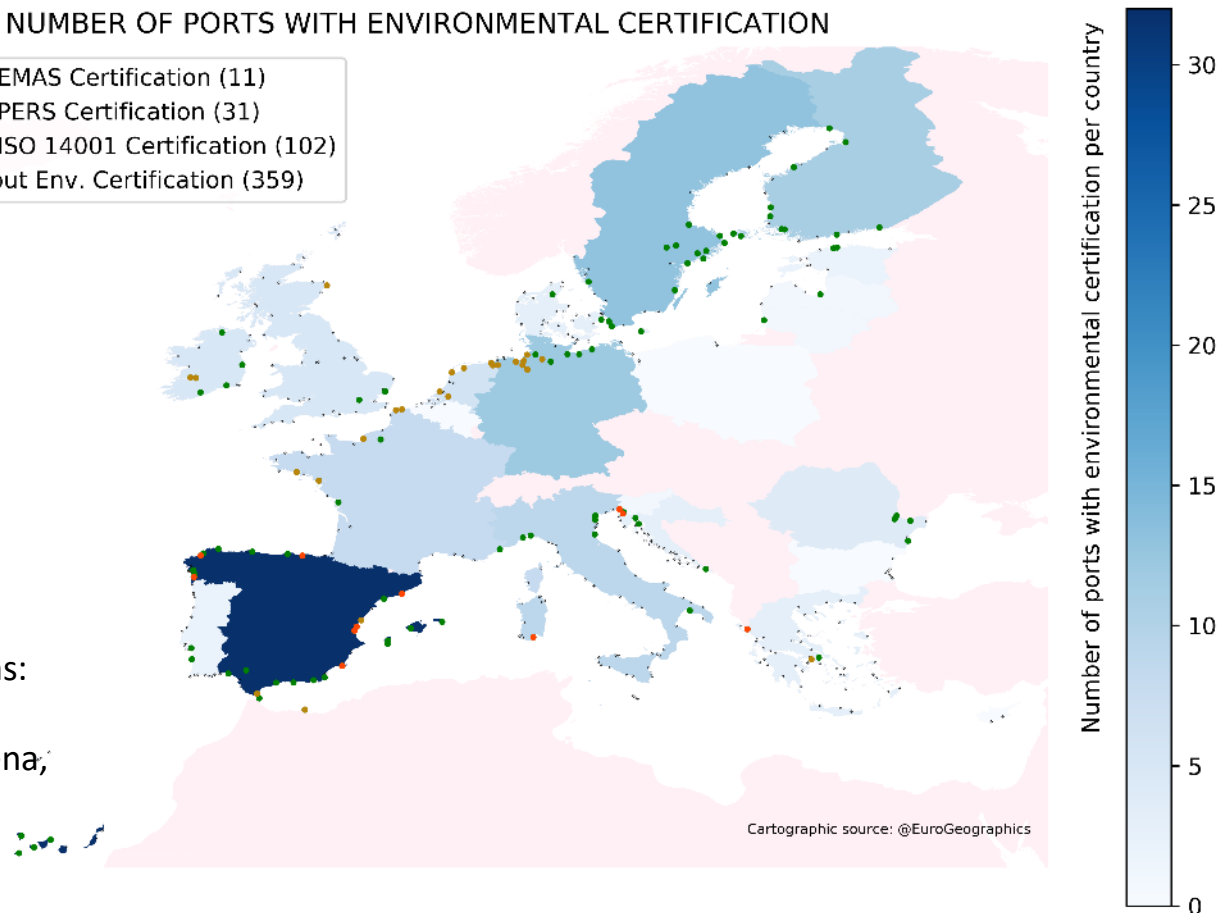

ENVIRONMENTAL CERTIFICATIONS

NUMBER OF PORTS WITH ENVIRONMENTAL CERTIFICATION

There are 6 ports with all 3 certifications:

- 1 Greek port: Igoumenitsa
- 5 Spanish ports: Barcelona, Cartagena, Sagunto, Valencia and Vigo

3. RESULTS

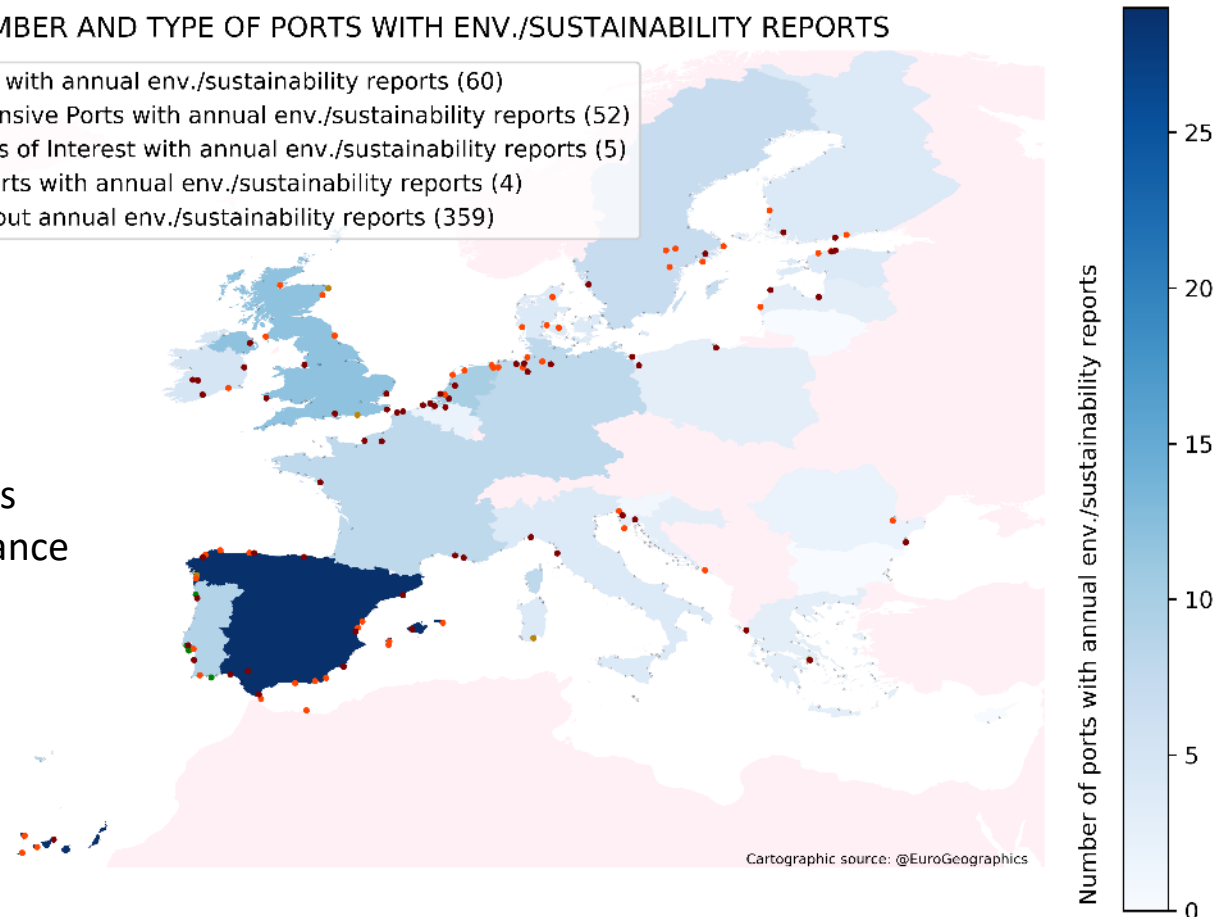

PUBLIC ENVIRONMENTAL/ SUSTAINABILITY REPORTS

NUMBER AND TYPE OF PORTS WITH ENV./SUSTAINABILITY REPORTS

- Core Ports with annual env./sustainability reports (60)
- Comprehensive Ports with annual env./sustainability reports (52)
- Other Ports of Interest with annual env./sustainability reports (5)
- Smaller Ports with annual env./sustainability reports (4)
- Ports without annual env./sustainability reports (359)

Found in 25% of the ports:

- 57% of core ports
- 23% of comprehensive ports
- 15% of other ports of relevance
- 3% of smaller ports

3. RESULTS

NETWORKS: ESPO

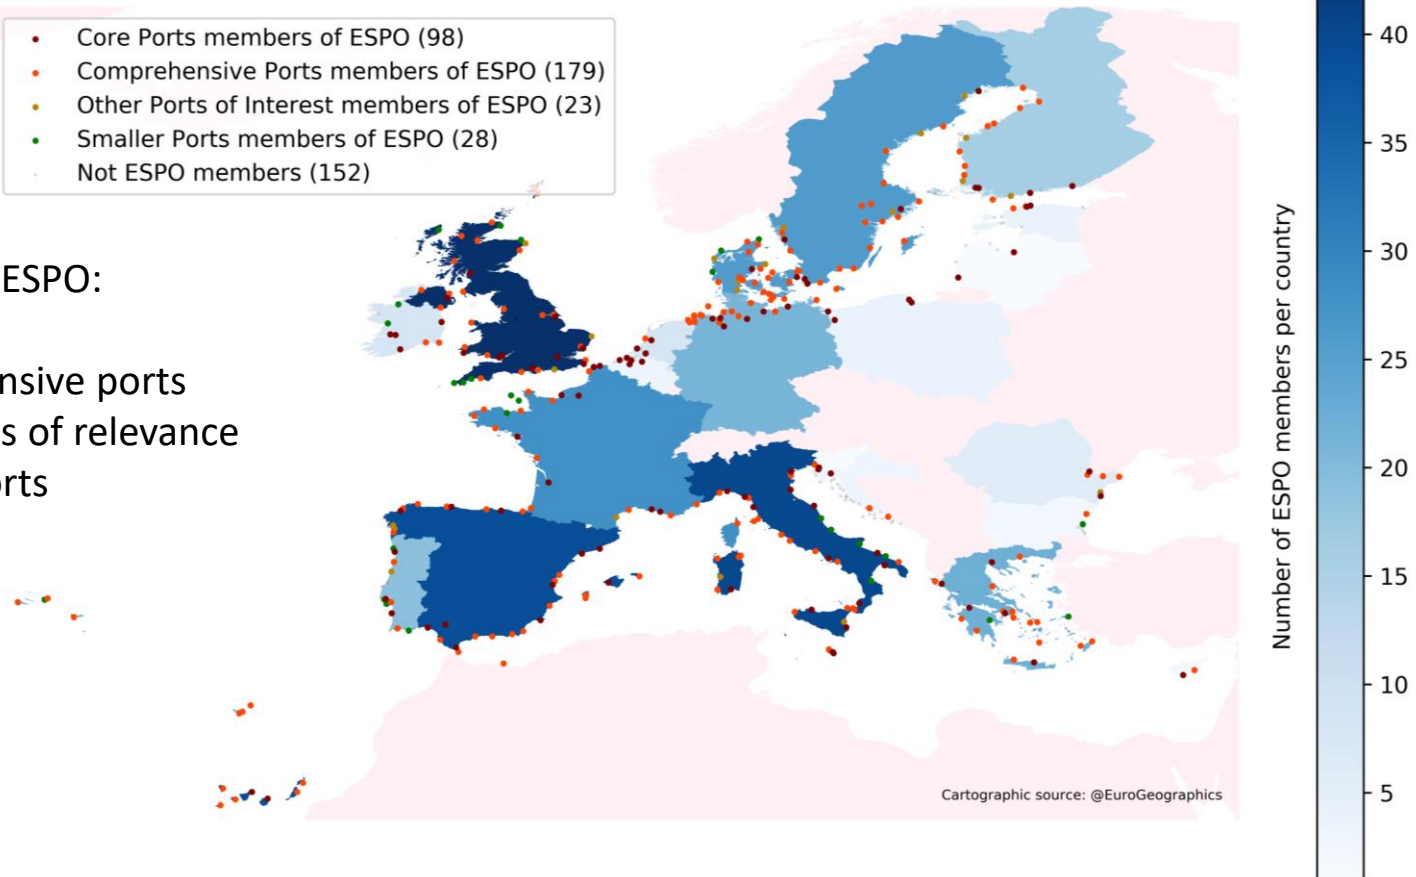

NUMBER OF ESPO MEMBERS PER COUNTRY AND PORT TYPE

- Core Ports members of ESPO (98)
- Comprehensive Ports members of ESPO (179)
- Other Ports of Interest members of ESPO (23)
- Smaller Ports members of ESPO (28)
- Not ESPO members (152)

68% are members of ESPO:

- 93% of core ports
- 80% of comprehensive ports
- 68% of other ports of relevance
- 18% of smaller ports

3. RESULTS

NETWORKS: ECOPORTS - WPCI

39% are members of ECOPORTS:

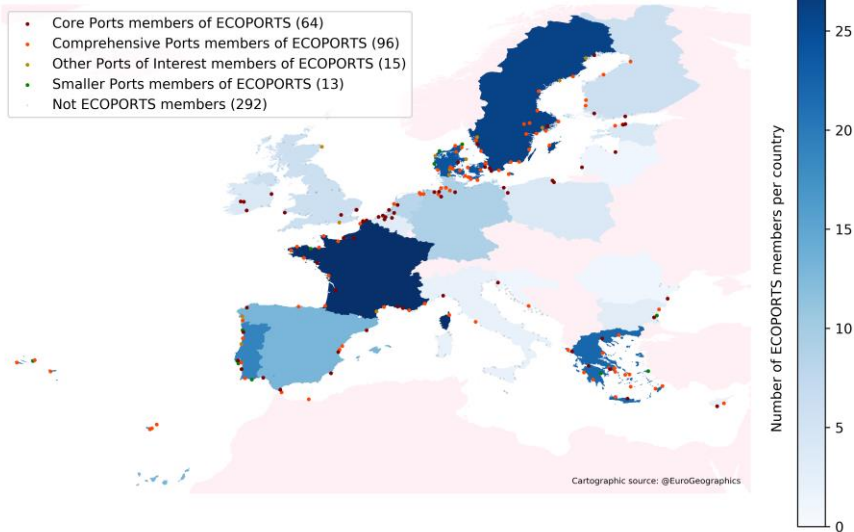

- 64% of core ports
- 43% of comprehensive ports
- 44% of other ports of relevance
- 9% of smaller ports

8% are members of WPCI:

- 27% of core ports
- 4% of comprehensive ports
- 3% of other ports of relevance
- 0% of smaller ports

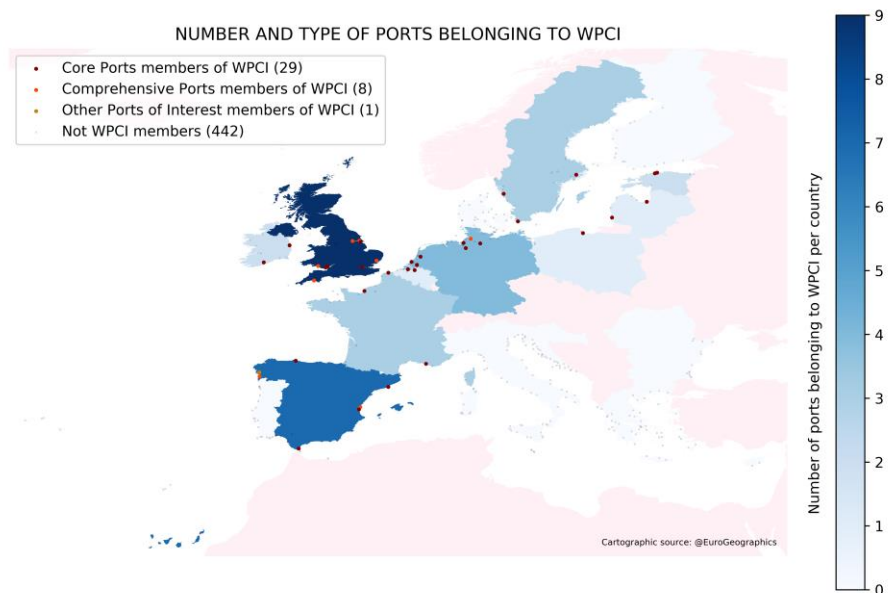

NUMBER OF ECOPORTS MEMBERS PER COUNTRY AND PORT TYPE

- Core Ports members of ECOPORTS (64)
- Comprehensive Ports members of ECOPORTS (96)
- Other Ports of Interest members of ECOPORTS (15)
- Smaller Ports members of ECOPORTS (13)
- Not ECOPORTS members (292)

NUMBER AND TYPE OF PORTS BELONGING TO WPCI

- Core Ports members of WPCI (29)
- Comprehensive Ports members of WPCI (8)
- Other Ports of Interest members of WPCI (1)
- Not WPCI members (442)

3. RESULTS

PORT SUSTAINABILITY INDICATORS

Circular economy monitoring framework

1 EU self-sufficiency for raw materials

The share of a selection of key materials (including critical raw materials) used in the EU that are produced within the EU

2 Green public procurement

The share of major public procurements in the EU that include environmental requirements

3a-c Waste generation

Generation of municipal waste per capita; total waste generation (excluding major mineral waste) per GDP unit and in relation to domestic material consumption

4 Food waste

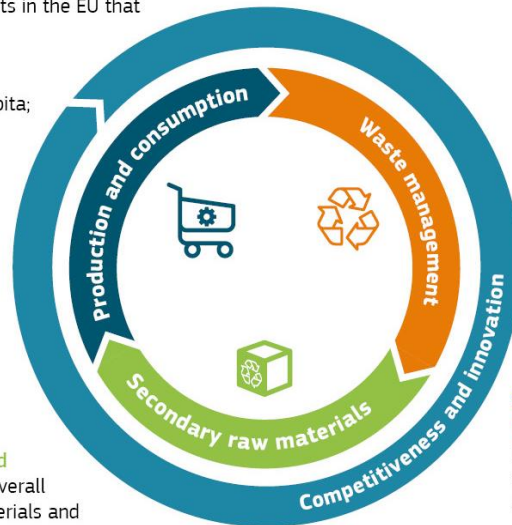

Amount of food waste generated

7a-b Contribution of recycled materials to raw materials demand

Secondary raw materials' share of overall materials demand - for specific materials and for the whole economy

8 Trade in recyclable raw materials

Imports and exports of selected recyclable raw materials

5a-b Overall recycling rates

Recycling rate of municipal waste and of all waste except major mineral waste

6a-f Recycling rates for specific waste streams

Recycling rate of overall packaging waste, plastic packaging, wood packaging, waste electrical and electronic equipment, recycled biowaste per capita and recovery rate of construction and demolition waste

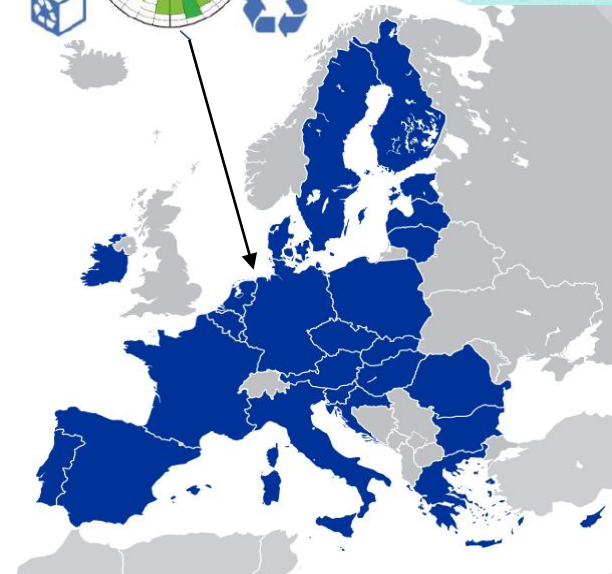

9a-c Private investments, jobs and gross value added

Private investments, number of persons employed and gross value added in the circular economy sectors

10 Patents

Number of patents related to waste management and recycling

CIRCLES OF SUSTAINABILITY

3. RESULTS

CLASSIFICATION OF SUITABILITY TO IMPLEMENT CE ACTIVITIES

Top10 in any of de indexes

Estonia	Tallin
Finland	Helsinki, Turku
France	Nantes St. Nazaire, Calais, Fort de France
Germany	Hamburg, Bremenshaven
Greece	Piraeus, Igoumenitsa

About / Overview

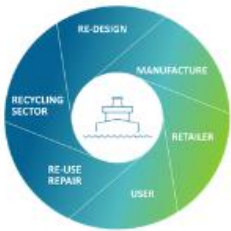

Discover the main objectives and expected results of the LOOP-Ports project funded by RT European Institute of Innovation & Technology under the Horizon-ERC to achieve a first step towards a circular economy in EU ports.

Overview

Circular economy network of ports

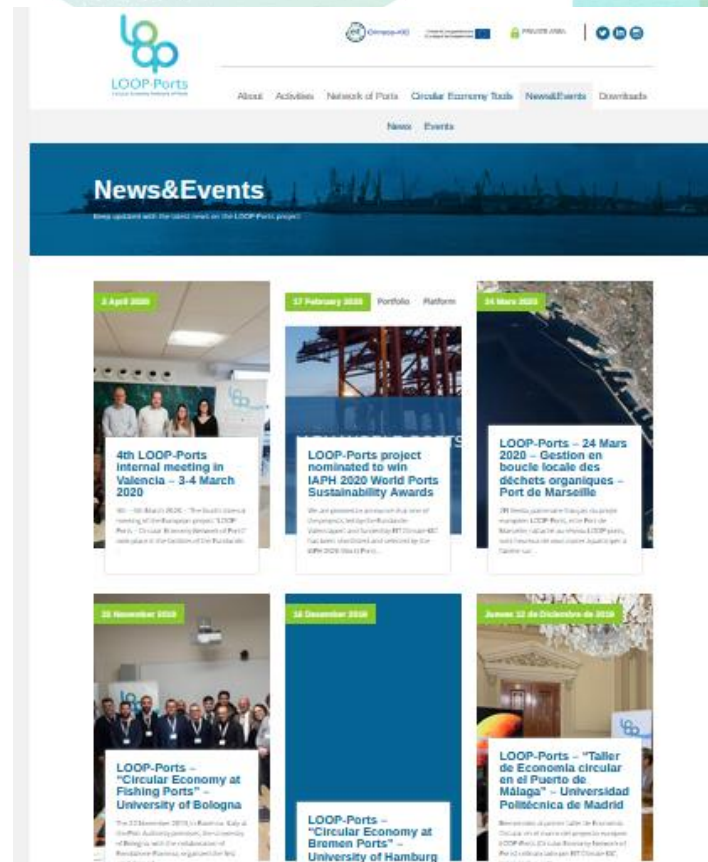

The main goal of the LOOP-Ports project is to facilitate the transition to a more circular economy in the port sector: where products, materials and resources are maintained in the economy for as long as possible, and the waste generation minimised.

This project will contribute to the transition of the European economy towards closed-loop systems through the creation of a circular economy network of ports, which will provide an innovation ecosystem around the port activity and stimulate circular economy initiatives in ports. The network will focus on high-emitting materials, mainly metals, plastics, ceramics and biomaterials.

LOOP-Ports involves 13 partners from 6 EU Member States (Spain, Italy, France, Germany, Denmark and Netherlands) and will be run for just over 3 years (36 months), ending in November 2020.

News&Events

Being updated with the latest news on the LOOP-Ports project

- 2 April 2020**
4th LOOP-Ports internal meeting in Valencia – 3-4 March 2020
The 4th internal meeting of the European project, LOOP-Ports, "Circular Economy Network of Ports" was held in the Galdames of the Port of Valencia.
- 17 February 2020**
LOOP-Ports project nominated to win IAPH 2020 World Ports Sustainability Awards
The project has been nominated for one of the European World Ports Sustainability Awards (IAPH) and is competing for the 2020 World Ports Sustainability Awards.
- 24 March 2020**
LOOP-Ports – 24 Mars 2020 – Gestion en boucle locale des déchets organiques – Port de Marseille
Le 24 Mars 2020, les membres du projet LOOP-Ports, en présence de M. Jean-Luc LAFITE, Président du Port de Marseille, ont participé à une réunion de travail.
- 20 November 2019**
LOOP-Ports – "Circular Economy at Fishing Ports" – University of Bologna
The 3rd internal meeting of the European project, LOOP-Ports, "Circular Economy Network of Ports" was held in the University of Bologna.
- 16 November 2019**
LOOP-Ports – "Circular Economy at Bremen Ports" – University of Hamburg
The 2nd internal meeting of the European project, LOOP-Ports, "Circular Economy Network of Ports" was held in the University of Hamburg.
- 16 November 2019**
LOOP-Ports – "Taller de Economía circular en el Puerto de Málaga" – Universidad Politécnica de Madrid
El 16 de Noviembre de 2019, los miembros del proyecto LOOP-Ports, en presencia de M. Juan Carlos LAFITE, Presidente del Port de Marseille, han participado en un taller de trabajo.
